

Google Book Search

Interpreting your Google Books Search Results

- Full View - digital version of entire book is available to view on screen or download as PDF. Items are in the public domain (published before 1923) or the author/publisher has given approval for access to the entire book
- Snippet View – view a few sentences around your search term

- Limited Preview – view a limited number of pages (access is determined by publisher). Usually the table of contents and/or index are included; sometimes whole chapters are available.
- No Preview Available – view basic citation information about the book

Limited portion of the book is available for preview. Access is determined by the publisher.

Stem Cells
by Jenny E. Tesar, Keith Elliot Greenberg - 2003 - 48 pages
This is one of the promises of stem cell research.
No preview available

Only citation information is available. Use the "Find this book in a library" link to determine availability.

Options

- Search in this book – allows the user to search within the book they have selected
- About this book – provides citation information (complete title, ISBN and subject headings)
- Find it in a Library – accesses WorldCat to search, by zip code, for libraries which own the item
- Buy the book – Click on one of the links to online booksellers to go to directly to a page where you can buy the book

My Library: create personalized libraries in Google Book Search where you can label, review, rate, and of course, full-text search, a customized selection of books. Your "library" lives online and is accessible when you log in to your account.
